Subject: KELSEYVILLE - Save the Name

To Whom It May Concern,

I am writing to express my strong opposition to the proposed name change of Kelseyville, California. While I understand the desire to distance our town from some of the unfortunate history of its early settlers, I believe that changing the name is not the right solution.

The name Kelseyville has been a part of our community for generations, and it is a name that many residents hold dear. The name does not solely represent the actions of the past but embodies the values and beliefs of the present. Changing the name would not only erase our town's history but also disregard the positive traits and characteristics that make Kelseyville unique.

I urge you to discard the proposed name change.

We aim to work together to build a more inclusive and welcoming community, rather than trying to erase our history.

Sincerely,
